

As part of the localism efforts of the FCC this docket as well as 04-233 supporting Low Power FM (LPFM) stations undermines the legitimacy of regular FM stations. LPFM stations will adversely effect stations such as K-LOVE heard locally on FM 90.7. This station strongly supports moral issues within our community. The music and service announcements serve to strengthen values by including programming that are positive in nature and not negative. It is the public interest to maintain this station and not to erode its ability to broadcast by allowing LPFM stations.
